Enjoy comfortable modern living

From our family to yours

At the age of 17, Mark began his career in fitting windows. As time went on, he gained invaluable experience and developed a deep understanding of the window industry. However, he grew increasingly frustrated with the lack of transparency and sales gimmicks prevalent in the industry. This motivated him to establish Polar Bear Windows, where he championed three key principles to provide customers with an exceptional experience.

Putting the customers needs first

We strive to provide products that perfectly match our customers' unique needs and specifications. To cater to every taste, we offer a wide range of designs to choose from.

Providing the best service

Our team is composed of highly qualified and experienced experts in the field. We are deeply passionate about providing our customers with an unparalleled experience.

"We have been fitting smiles across Bristol for years"

Quality products without compromise

We offer high-specification products that come equipped with the latest and best features available on the market, all at affordable prices.

Polar Bear Windows has experienced tremendous growth and now boasts a team of over 15 professionals who work together seamlessly to offer a broad range of home improvement products that transform your living standards.

Thanks to our team's hard work and dedication, we've been rated the best in Bristol for customer satisfaction in window and door installations, so you know you're in professional hands.

Mark Price
Managing Director

Highly rated service

Voted the best in Bristol for customer satisfaction

Our success has been the result of years of hard work and unwavering dedication, allowing us to offer you an amazing service, top-quality products, and unbeatable prices. Don't just take our word for it - we have received over **1,000 positive online reviews** from satisfied customers.

We believe in amazing products, great service at honest prices.

Over **1,000 positive reviews** from satisfied customers

Excellent service from start to finish, very friendly, polite and helpful staff (no hard sale). Very pleased with my new windows and door. **Will definitely recommend** to family and friends. N Barrett. Review left on Google

Excellent fitting carried out by Tony and Jason, they were **very polite and professional**. My new windows and doors look great, would highly recommend Polar Bear. J Moore. Review left on Facebook

Polar Bear Windows have been fantastic from quotation, to survey, to installation today. All of the staff I have dealt with have been **incredibly helpful and efficient** - in particular, Rosie has gone above and beyond! Really pleased with how my final product looks and the fitting is fantastic. Excellent value for money as well. B Panton. Review left on Facebook

Brilliant service. Review left on Ekomi

We have nothing but praise for this company, from day 1 of contacting them they have been superb, Paul and lee was sent to us to install our windows and patio doors, the work they did was superb, they **took great care and pride in there work**, very courteous and polite, there standard of work was second to none, site was left clean daily, there aim was totally focussed on making sure we were happy, they explained all what they done daily so we were kept up to date with how things were going etc, we like to say a big thank you to all we have dealt with at Polar Bear. Jason T. Review left on Yell

Excellent service and product. From quotation to fitting everything went to plan and completed on time. Very helpful and friendly staff. **The fitters were amazing**. No mess and very little dust even though an opening was cut for French doors. Everything was done to ensure my belongings were respected. I cannot recommend this company highly enough and would definitely use them again. Many thanks. Review left on Checkatrade

So impressed! A pleasure to deal with such a lovely company, thanks. Review left on Ekomi

Big thank you to Mark and team. Scott and Aaron were friendly and professional. **Excellent job** done quickly and efficiently on conservatory. Barry. Trustpilot

Proper nice job on the windows, friendly staff and **good price**. Would recommend and use again. M. Banks. Trustpilot

Accreditation and governing bodies

One of the UK's leading provider of Insurance Backed Guarantee, which are designed to protect your payments.

Promotes the importance of quality of work and service within the trades.

CERTASS

For certain projects, it may be necessary to obtain a CERTASS certificate to demonstrate compliance with building regulations. This is particularly important if you plan to sell your property in the future.

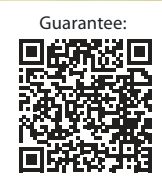

By thoroughly vetting tradespeople and ensuring that they meet strict installation standards, Checkatrade instils confidence in customers when choosing a tradesperson for their project.

Ensure that local, trustworthy and reliable tradespeople, working to Government-endorsd standards.

Key benefits

How we compare to other installation companies?

It is important to know all the facts before making a purchase to ensure you are getting the best product and service. One of our values as a business is to be transparent with our customers and we have done research to help you compare window companies in Bristol. Visit our website to find out why 100s of homeowners choose Polar Bear Windows every year.

Comparison chart:

Good today and tomorrow

Green principles in action

We are dedicated to creating a positive impact on the environment and strive towards a sustainable future for generations to come. To achieve this, we have implemented various processes and practices aimed at minimizing our environmental footprint.

Energy efficient

All our windows, doors and conservatories have excellent energy efficient ratings ensuring all our customer's benefit from less heat-loss in the home which also lowers energy bills.

Old products removed

We collect your used products, including those made of metal, glass, and plastic, and transport them back to our warehouse for recycling.

Suppliers

Work with suppliers which have a passion and proven track record of working sustainably to a high level.

Logistically

We are committed to reducing our carbon footprint at every stage of the process, from home appointments to installation, by implementing efficient logistical practices.

Journey

What a difference a few steps makes

Step 1

Get a quote

Designer

Our friendly designer will visit you at your property to take measurements, discuss your requirements and provide you with a quote.

Website

Various online tools for you to design your product and receive a quote.

Showroom

Talk to our friendly sales team about your requirements and receive a quote.

Email/telephone

We can also give you a quote over the phone/email.

Step 2

Complete order

Surveyor

After you sign the contract and pay a deposit we will arrange for a surveyor to visit the property to finalise your order and take precise measurements. Your order is then signed off by the surveyor.

Manufacturing

We will send the order forms to the manufacturing department/supplier and schedule an installation date with you once we have a confirmed delivery date. 1 Week before your installation date– we will collect the second staged payment.

Step 4

Installation

Quality control

Products arrive at our premises and undergo further quality control checks.

Installation day

Please ensure that the work areas are free of obstructions prior to the installation.

Our installation teams are highly experienced and undergo regular training to ensure you receive professional installation.

Complete payment

Remaining 10% payment is required on the day of installation.

Step 5

After-care

Guarantee

Windows, doors and conservatories are covered with an extensive guarantee which will be sent to you after we receive full payment. You will also get after-care instructions.

If any issue arise– contact us immediately with the issue and your order details. We aim to resolve issues as quick as possible.

Registered installation

If you have had a new-for-old installation we will register your installation with CERTASS which is needed when you sell your property. You will receive your certificate in the post.

Quality assured

Windows

Upgrade your home with new energy-efficient, secure, and stylish double-glazed windows.

We ensure that all our windows are professionally installed and made to measure, seamlessly integrating with your home. Our uPVC windows have an A Rated energy efficiency rating and feature thermal break glass and treated surfaces for maximum thermal rating and noise reduction, resulting in a warmer and quieter home.

ALL IN ONE SOLUTION

A Rated energy efficient windows

A rated windows are designed to keep your home warmer so you do not need to turn your central heating up as much which will save you money on energy bills.

Newer for longer

Our windows are crafted with high-quality materials and designed with exceptional weatherproofing to ensure they last longer, looking new for years to come.

Security

The security of our customers is very important to us which is why all of our windows come packed with security features including multi-point locking systems.

Virtually maintenance free

Our windows require minimal maintenance, saving you both time and money. To keep them looking new, simply wipe them down with a damp cloth and lubricate any moving parts as necessary.

Noise reduction

Our standard windows has good acoustic ratings. If you live next to a busy road we recommend acoustic glass (6.4mm toughened/ laminated windows) or triple glazing which is specially designed to reduce noise pollution allowing you to enjoy a quieter home.

Quality throughout

Our windows are constructed with high-quality materials and incorporate advanced technology to deliver long-lasting performance.

Old windows can let heat escape

Quality energy efficient windows can dramatically increase your energy rating

Images for illustrative purposes

A Rated energy efficient windows

By installing energy-efficient double-glazed windows, you can significantly reduce the amount of heat that escapes through your windows, resulting in faster and longer-lasting room warming. This not only lowers your energy bills but also benefits the environment by reducing the amount of energy required to heat your home.

Energy efficient double glazed casement windows

Casement windows

Casement windows are the top pick for new and replacement windows in the UK, thanks to their versatility. These windows can be fully opened depending on whether they are side-hung, top-hung or a combination of both.

With an A Rating for energy efficiency, our casement windows will keep your home comfortable all year round and for many years to come.

Manufactured in Bristol, our casement windows are practical, stylish and have all the benefits of modern uPVC windows.

Window specification

We are constantly improving our processes to ensure you receive the best possible products. Our current windows are the best we have ever offered.

Casement window benefits:

- A Rated for energy efficiency
- Rollers for smooth day-to-day operation
- Weather resistant seals
- Robust multi-point locking system
- Secured by quality construction
- Multi-chambered cross-section which helps to prevent heat loss
- Endurance tested for durability
- Corrosion resistant handles, hinges and shootbolts
- Exceeds the PAS24 test
- Virtually maintenance free

RESIDENCE 9

Premium flush windows

Residence 9 is a premium window system designed to authentically replicate 19th Century timber windows. Great attention to detail has been employed to create clean seamless frames which is ideal for period properties that want to retain their original heritage.

Residence 9 is an eclectic blend of traditional aesthetics and innovative design. Whatever period your property is, we know your Residence 9 windows and doors will look great as we copied historical design and considered conservation guidelines, which authentically replicate traditional timber sightlines. You'll immediately notice the benefits of the thermally efficient 9 chamber design and modern glazing, whilst retaining the character of your home, thanks to it being traditionally transformed by Residence 9.

Residence9 windows are practical, stylish and have all the benefits of modern uPVC windows.

Bay windows

Bay windows extend outwards from a room, increasing surface area, allowing more light in and providing better views of the outside. We offer casement, flush, and sash windows that can be installed in bay structures.

Our windows are practical, stylish and have all the benefits of modern uPVC windows.

No more rattling, sticking, draughts, painting or expensive maintenance

To start your Polar Bear Windows journey call **0117 327 0127** email **sales@pbwl.co.uk**

Bow windows

Combining four or more casement windows projecting beyond the exterior wall of a home, to provide a wider view of the garden/street.

We can convert large flat windows into bow windows which gives a home a more sculptured appearance.

Tilt and Turn

The tilt and turn window offers the benefits of a standard casement window with added functionality. The handle can be turned halfway to allow the window to tilt inwards for effective ventilation, or turned completely to fully open the window on the side, improving ventilation further or making it easy to clean from the inside.

PRIMA
FLUSH CASEMENT WINDOWS

Perfect in every way

Our flush casement windows are a versatile and stylish option that complement both period properties and modern homes. They are hand-crafted using innovative, multi-chamber uPVC window systems that offer a sleek profile without overlapping. You can choose from a range of stylish finishes to match your home's aesthetic.

These windows feature a double rebated seal, making them weatherproof and highly secure. Our patented design is also draught-proof, eliminating any whistling and ensuring maximum protection against harsh weather.

Beautiful aesthetics

Our flush casement windows boast a sleek, minimalistic design that exudes timeless elegance, making them an excellent alternative to traditional timber windows or a perfect choice for achieving a modern look in contemporary homes.

Virtually maintenance free

Our windows are virtually maintenance-free, they do not warp, requiring sanding, painting, or staining. Giving you more time to focus on the more important things in life.

Affordable

If you're looking to upgrade to flush windows, our flush casement windows are the best option for you. They are a premium product available at a reasonable price.

High specification

We have surpassed the industry standards by utilizing cutting-edge technology and intelligent manufacturing processes to create our flush casement windows.

Windows which meet the highest standards and exceed expectations

A blend of traditional aesthetics and modern innovative design. Whatever period your property is we know your new windows will look great. You will immediately notice the benefits of the thermally efficient multi-chamber design and modern glazing, whilst retaining the character of your home.

What is a flush window?

Flush windows are designed to sit flat with the frame when closed, providing a sleek profile that resembles period timber windows. Thanks to their minimalist aesthetics, flush windows have become increasingly popular for modern homes.

Specification

Multi-chambered profile for strength

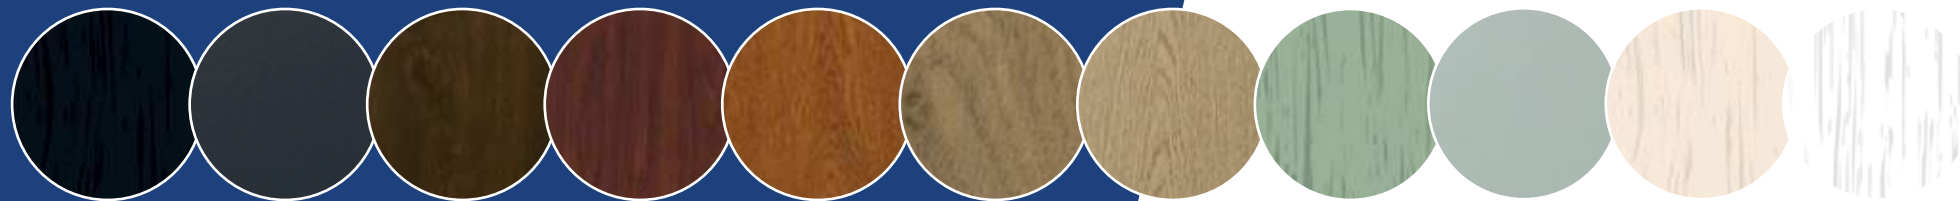

Extra secure window

Up to A++ rated for energy efficiency

U-Values: As low as 0.8W/m2K

Sash windows

Wide range of colour and finishes to suit your home. You can also have any RAL colour.

Tilt inwards for easy cleaning

Sash windows

Sash windows were popular during the Georgian period because they did not protrude when open, avoiding obstruction on the outside. Additionally, they did not swing open or closed in the wind.

Smooth operation without windows slamming shut. Our sash windows are practical, stylish and have all the benefits of modern uPVC windows.

Sash windows can be unlocked from the rails to open up easily giving access to the outside of the windows allowing easy cleaning.

Full details of sash windows at polarbearwindows.co.uk

For an authentic wood effect we have textured finish frames which is perfect for conservation areas or if your homes building regulations require a wooden appearance.

Quality assured

Doors

Most intruders gain entry to a property through a door. Ensuring you have a high-security door means your home and family are protected.

All our doors have the following benefits as standard:

Security

The security of our customers is very important to us which is why all of our doors come packed with security features, include a multi-point locking systems.

Locks

A door is only as secure as its lock, that is why we use industry leading cylinders from ULTION (3 star versions which is the highest rating).

Virtually maintenance free

All our doors are virtually maintenance free, saving you time, hassle and money. To keep them looking new, occasionally wipe with a damp cloth and lubricate moving parts.

Quality throughout

All of our doors incorporate the latest technological advancements, utilising top-quality materials and designed for exceptional durability and long-lasting performance.

Weatherproof

All our doors have been designed to withstand the adverse British weather all year round.

ULTION 

Protect your family and home

The difference between a standard lock and a 3 star cylinder lock can be the difference of a safe home and a successful forced entry.

Benefits of ULTION 3 Star locks

- 8 drill defences
- Anti-snap, anti-drill, anti-bump
- Core that is 25% denser than iron
- Most locks have 6 pins, ULTION has 11
- 295,970 key combinations
- Sold Secure approved - tested by locksmiths

As standard on all composite doors. Also available on back doors, patio and bi-folds.

French doors

All the modern benefits of uPVC doors including enhanced security, energy efficiency, durability and virtually maintenance free with the style of classical French doors.

French doors come in a range of colours and wood grain finishes. Astragal bars or leaded options also available.

Back doors or windows openings can be expanded to provide enough space to install French doors which would greatly improve visibility, accessibility and light entering the room.

Handles and hinges come in white, chrome, gold and black.

French doors come in uPVC as standard, aluminium version also available.

Patio sliding doors

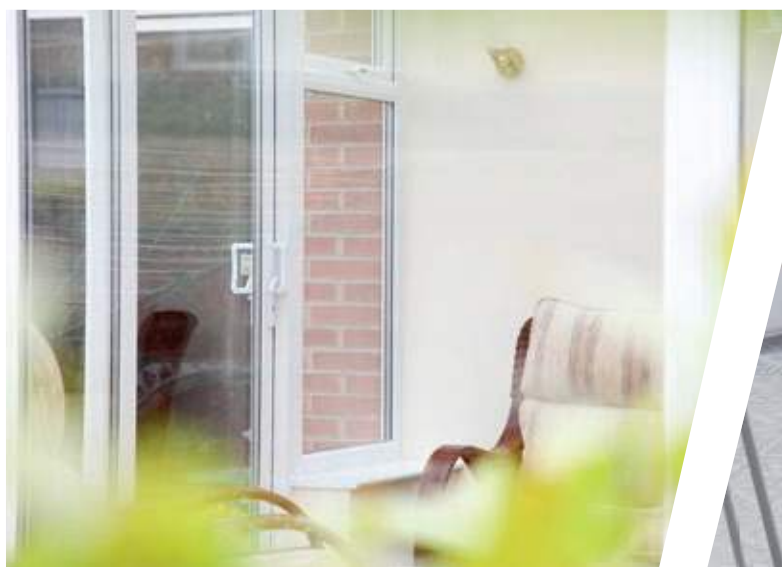

Patio doors do not need clearance to swing open/close making them a great choice for when space is limited. Traditional doors can also swing with the wind and cause disturbances but patio sliding doors do not have this issue which homeowners might appreciate.

Multi-point locking system, high quality locking cylinders, durable construction and stylish hardware make our patio doors a great addition to any home.

Back doors or window openings can be expanded to provide enough space to install patio sliding doors which would greatly improve visibility, accessibility and light entering the room.

Handles and hinges come in white, chrome, gold and black.

Patio doors come in UPVC as standard, aluminium version also available.

Composite doors

Get the best door on your street

**ROCK
SOLID**
COMPOSITE DOORS

Secure your home and family

Utilising the benefits of several different materials to provide great strength, durability and stylish looks. Composite doors are the new standard in door innovation and high security front doors.

Rock Solid Composite Doors are a premium door range at an affordable price.

- Extensive range of designs and style
- Up to 20 year guarantee
- High security multi-point locking system
- Industry leading ULTION 3 star locks, see page 40
- High-density foam core which provides better soundproofing and insulation than timber. Timber core also can warp and bend if exposed to moisture
- Internally glazed and multi-chambered
- Virtually maintenance free
- High performance door hinges
- High performance weather-seals
- Steel reinforcement
- Excellent in both sound reduction and heat retention

Keep your family safe all year round

Packed with security features

Newer-for-longer quality

Virtually maintenance free

Hand-crafted masterpiece

Traditional

Your front door speaks volumes about your personality and style. Our traditional door styles are meticulously crafted to emulate the most beloved timber doors, featuring distinct mouldings and lifelike wood-grain textures on the surface.

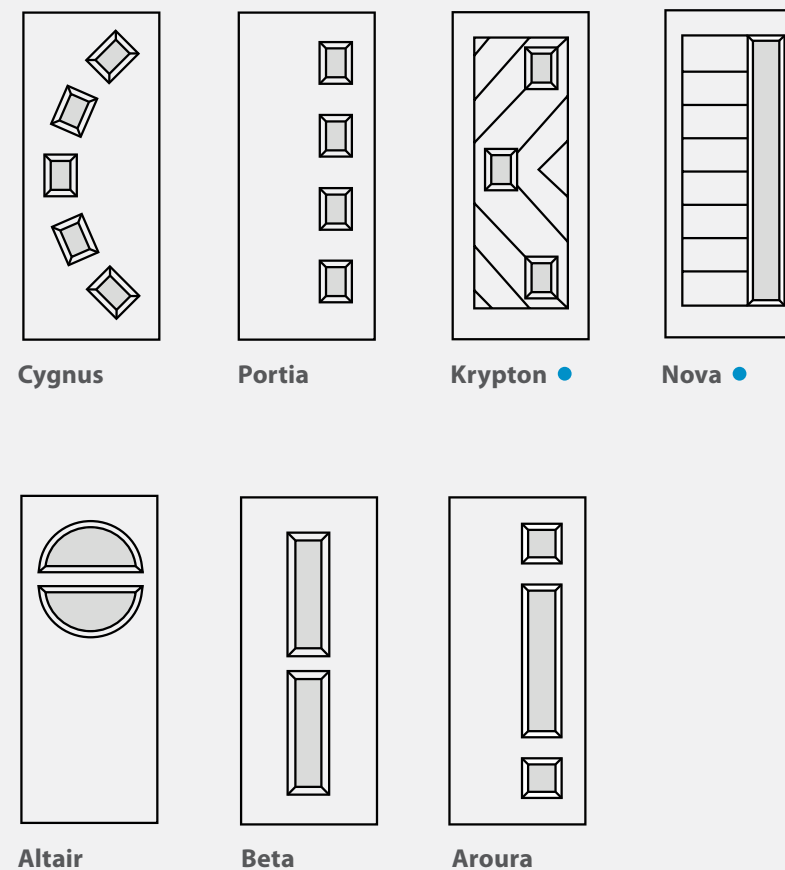

Key

- Also available without glass

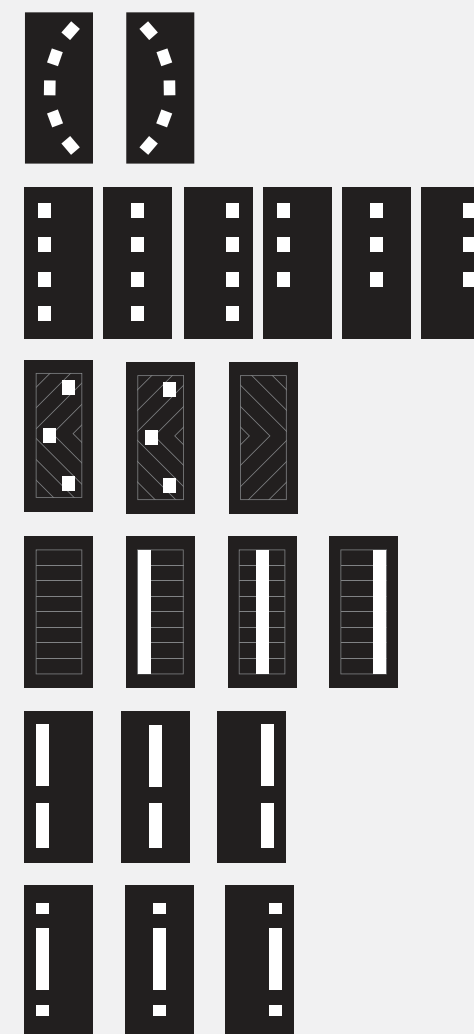

Contemporary

Our contemporary door styles offer a range of sleek and stylish designs, accompanied by a carefully curated selection of decorative glass options that elevate the door's appearance while retaining its clean and modern aesthetic.

Different door layouts in our contemporary range

+17%
Most energy efficient
composite door on
the market*

*Doors were tested at the University of Salford's Energy House. This represents a typical Salford 1919 terraced house and its construction represents 21% of the UK's current housing stock. The house has been reconstructed in a fully environmentally controllable chamber, in which climatic conditions can be maintained, varied, repeated and patterns monitored. For the test, the inside temperature of the Energy House was 25°C with an exterior temperature of 5°C.

Industry leading cylinders

The safety of our customers is paramount in every decision we make when building our composite doors. When it came to cylinders the decision was easy – high specification Ultion 3 star industry leading locks.

Ultimate security

Our multi-point locking system is designed to provide maximum security for your home. It includes features such as anti-bump, anti-pick, anti-drill, anti-snap, and anti-extraction systems, all of which come as standard because we believe safety should be accessible to everyone.

Accredited

Approved by the Police, tested by locksmiths with the Master Locksmith Association and is accredited with their highest standard.

Beyond secure

From LockDown Mode, Molybdenum (a super alloy), 11 pins (standard is 2x) and 20 point drill protection adds to an already high-security lock.

10 YEARS SECURITY PLEDGE

If you suffer a forced entry gained via the multi-point locking system on any of our doors supplied and installed by us, we will replace the damaged product and install it free of charge. This is exclusive to Polar Bear Windows, see website for more information.

ULTION 
£5,000
guarantee

Should a burglary take place and entry was achieved by snapping an Ultion lock, Ultion will pay you £5,000. Full details and how to register:

Walls can be brickwork, uPVC panelling, glass or a combination.

Foundation

Building on an existing area or created from new. Wooden or concrete foundations are available depending on budget.

A computer-generated visual can be created to show you how your new porch will look once it is built.

uPVC white composite door, panel sides with clear glass and lean-to tiled roof.

Bricked porch with clear windows and lean-to roof.

Panelled porch with decorated glass and lean-to roof.

Panelled porch with obscure glass and lean-to roof.

Modern aluminium bi-folds

A must-have
for any modern
home

Bi-fold doors consist of multiple panels, with one panel acting as the access door. These panels fold in a concertina-style against the wall when opened, resulting in a space-saving solution when compared to other types of doors.

Aluminium is 3 times stronger than uPVC making it ideal to hold large panels of glass. The stronger profile also means the frame can be slimmer allowing more uninterrupted views of your garden.

Bi-fold doors are built using high quality materials and crafted with great precision to achieve the highest levels of strength and durability.

Our bi-fold doors have excellent thermal efficiency, weatherproofing and security, which has made them very popular with people upgrading your home.

Masterpiece of engineering and style

Security

The security of our customers is very important to us which is why all of our doors come packed with security features, such as a multi-point locking systems.

Virtually maintenance free

All our doors are virtually maintenance free, saving you time, hassle and money. To keep them looking new, occasionally wipe with a damp cloth and lubricate moving parts.

Extensive range

Extensive range of profiles to suit a wide range of needs. We work with a few leading suppliers to bring you the best options on the market.

Quality throughout

Using the latest innovations, high-grade materials and are constructed for durability and a long product lifespan.

Weatherproof

Aluminium bi-fold doors have been designed to be fully waterproof and able to withstand adverse weather conditions.

Durability

Our bi-fold doors are designed to last for many years thanks to our robust construction, high-quality parts, and innovative manufacturing process.

Upgrade your home today

Making room for bi-fold doors

Expanding old window or door openings can provide the opportunity to install bi-fold doors, which can enhance your views of the garden and bring in more natural light into the room.

Completely
bespoke service

Security

A robust and durable multi-point locking system ensures bi-folds can only be opened with the key.

Magnetic door catch

Round magnetic catches attached to folding doors, hold the doors in place when opened.

Threshold

Several threshold options to suit your needs. From step threshold for maximum weather protection to flush threshold for a smooth unobstructed transition.

Trickle vents

Some local Building Regulations will require trickle vents to help ventilate your window or door frame.

Window blinds

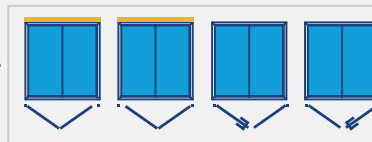

Integral blinds can be installed within the glass panels that are controlled by a magnetic catch. This modern mechanism keeps the appearance of the doors looking minimal.

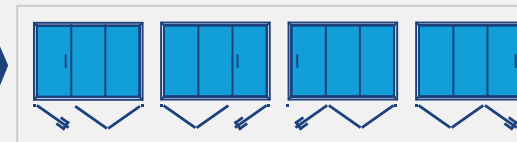

Door opening styles

We offer bi-fold doors with 2 to 8 panels, depending on the size of the opening you want to achieve. The doors can be configured to push out or pull in, with the main access door placed on the side or middle of the configuration. Bi-folds with yellow markings do not have an access door but can be opened and closed by folding.

Benefits of bi-folds doors?

Space-saving: Bi-fold doors fold up compactly against the wall, taking up less space than traditional large doors when opened.

Natural light: Bi-fold doors typically have large panels of glass, allowing natural light to flood into your home and creating a brighter, more naturally-lit space.

Energy-efficient: Energy efficient double glazing and insulated frames that help to keep your home warm in the winter and cool in the summer.

Improved access: Bi-fold doors can provide easier access, creating a seamless transition between indoor and outdoor living areas.

Aesthetically pleasing: There is no doubt that bi-fold doors with its sleek profiles and large glass panes look fantastic.

DOORS AND WINDOWS

Premium aluminium bi-fold doors with more options and extra features.

Origin bi-folds is a premium brand due to its extensive range of customisation options, making them very adaptable to suit many luxury homes. There is quality in every detail which makes them admired from every angle.

Excellent energy efficiency, larger glass panels, slimmer profiles make Origin the number one choice for modern bi-folds.

An exclusive finger safe gasket system prevents fingers getting trapped between the panels when opening/closing.

Threshold come in standard, low and flush.

A full spectrum of 150 colours, you can have a combination where the inside and outside profile are different colours to suit your inside, outside space.

Wood grain finish also available for an authentic wooden aesthetic.

Handle styles which also come in different finishes.

Create a panoramic room

Conservatories

Lots of natural light, panoramic views and stylish structures can make your conservatory your favourite room in your home.

The extra light and space really elevate the atmosphere to give it a sense of grandeur.

conservatory

Security

Security features throughout making a new conservatory safe and secure.

Virtually maintenance free

All our conservatories are virtually maintenance free, saving you time, hassle and money.

Energy efficient

Excellent thermal performance throughout. All our conservatories come with toughened/ laminated glass which is stronger and if broken shatters into small pebble-like pieces.

Home comforts

Your new conservatory can be equipped with heating, lighting, and electrical outlets to create a comfortable living space that feels like an extension of your home.

Quality throughout

Our conservatories are built to last, using high-quality materials and innovative construction techniques, ensuring they are not only aesthetically pleasing, but also durable and long-lasting.

Conservatory styles

Victorian

Victorian conservatories are a popular choice due to their ornate pitched roof and bay front. The angled bay front provides a softer protrusion from the house compared to a flat front conservatory.

Lean-to

Flat angled roof that slopes outwards makes the lean-to conservatory suitable for spaces with height restrictions. The simplicity in the design means lean-to conservatories are great value for money.

Gable

Influenced by Georgian styles, the structured appearance with its symmetrical structure, pitched roof, ornate detail and flat vertical front gives the gable conservatory impact and grandeur.

Edwardian

Symmetrical build, clean lines and 3 sides hipped roof with ornate ridge detail on top. Very stylish conservatory for you to enjoy all year round.

Custom

Often referred to as a P, L or combination conservatory, you can mix existing structures to create a truly unique space.

Frequently asked questions

Plan your conservatory carefully

Our conservatory sales designer will guide you through the entire design process and offer you a 3D computer-generated image of the final product, tailored to your specifications.

Is planning permission required?

Depending on the size of your garden and the desired conservatory size you often do not need planning permission. Please check with your local council for up-to-date and relevant guidelines which could apply to your property.

What is the best position for your new conservatory to be installed?

Most conservatories are placed around access points such as back door or wall openings.

What style will suit your home?

Whether your home is a period property or more contemporary, there will be a conservatory to suit every style. We can match your conservatory seamlessly to your home in terms of brickwork, colours and style.

Roof

Polycarbonate

Polycarbonate has become less popular over the years as glass technologies have improved and become affordable. Main benefits of a polycarbonate roof is the low cost.

Glass

Glass is the most popular choice for conservatory roof. The high performance insulated glazed panels gives you a view like no other.

Solar control glass

A special transparent layer reduces the amount of heat passing through it, ensuring that your conservatory stays cooler during hot summer days. The filter also helps to prevent furniture and carpets from fading.

Self cleaning glass

During the manufacturing process, a special coating is added to the glass. This coating makes it more difficult for dirt to adhere to the surface, keeping the glass cleaner for longer. This is particularly useful if you live next to a busy road.

Tiled conservatory roof

A premium options which makes conservatories look more like an extension of your home.

Walls

We have a few options for conservatory walls to suit your requirements; glass, panel or bricked wall.

A rated double glazing windows can be used to create walls with UPVC panels underneath. Glass and panel proportions can be adjusted to suit your needs.

A more premium option is to build a small bricked wall where the windows are placed on top.

Tiled premium roofs

Range of conservatory roof options to enhance your home.

High specification conservatory roofs replacements

Replacement conservatory roofs are a great way to update and transform your existing conservatory. By choosing a tiled roof, you'll be able to bring your conservatory up to date – and add value to your home – by using the latest in replacement conservatory roof technology. Whether you're looking for a thermally-efficient glass roof to let the light flood in, a mix of both glass and solid panels, or a lightweight tiled roof for a more traditional finish, our range of replacement roofs will reward you with a beautiful light room which you can use all year-round.

Replacement conservatory roofs is the result of years of research and development. By securing the latest standards of performance, appearance and durability, you are sure to find the ideal home improvement solution for your property. Internally, tiled replacement conservatory roofs are stunning. They can deliver a magnificent vaulted ceiling and incorporate an internal pelmet around the perimeter, where lights can be installed. Your new room will look and perform like a natural extension of your home. At the ridge at the top of the roof, you can insert or hang lights. If a vaulted ceiling isn't for you, there is an option of a suspended ceiling, allowing you to continue the ceiling height from an adjoining room or to give your room a more 'cosy' feel.

When innovation meets elegance

Aluminium is naturally stronger than uPVC and does not need reinforcements which allows for smaller profiles. Its strength also accommodates larger glass panels giving you an increased uninterrupted vista.

Aluminium is stronger, more durable and has slimmer profiles

Modern aluminium products offer superior quality over uPVC and are fast becoming the material of choice for home improvements.

- Up to 50% slimmer profiles create uninterrupted views
- Aluminium windows do not swell, crack, split or warp over time ensuring an extended product life.
- Weather resistant under a range of severe environmental conditions.
- Aluminium is 3 times stronger than uPVC and 4.3 times stronger than wood.
- Highest recycling rates compared to any other metal. The recycling process of aluminium requires just 5% of the initial energy.

**Benefit from strong,
durable and slim
profiles which will
transform your home**

Roof lantern

A roof lantern is a popular choice for modern extensions as it adds character and style while also creating a sky view, making the extension feel more spacious and open.

Roof lanterns allow an abundance of natural light into your modern home, creating a bright space and making the room seem bigger.

The use of aluminium slim rafters in constructing the roof allows for slim and elegant roof profiles while still achieving excellent thermal performance.

Strong, secure, thermally efficient and slim profile

Windows, doors & conservatory repairs

It is important to repair any issues with your windows, doors, and conservatories to prevent them from turning into larger and more expensive problems in the future. Faulty products can also compromise the security of your home and invalidate your insurance in the event of a burglary.

Our company offers hassle-free repair services for windows, doors, and conservatories (excluding roofs). You can contact us for a free quote or even email us photos of the issues for a quick assessment and quote.

How to Grow Your Business with a Franchise

Franchising is a popular way to grow a business, and it can be a great way to expand your reach and increase your profits. However, it's important to understand the risks and rewards of franchising before you decide to join a franchise system.

One of the main benefits of franchising is that you can benefit from the experience and expertise of a established business. Franchises often have a proven business model, a strong brand, and a large network of customers. This can help you to attract more customers and increase your sales.

Another benefit of franchising is that you can share the costs of marketing and advertising. Franchises often have a national advertising campaign, which can help you to reach a wider audience and increase your brand awareness.

However, there are also risks associated with franchising. One of the main risks is that you may not be able to compete with other franchisees in your area. Franchises often have a territorial agreement, which means that you are only allowed to operate in a specific area. This can limit your growth potential.

Another risk is that you may not be able to control your own destiny. Franchises often have a strict set of rules and regulations that you must follow. This can limit your ability to make decisions about your business.

Despite these risks, franchising can be a great way to grow a business. If you are considering franchising, it's important to do your research and choose a franchise system that is a good fit for your business.

Here are some tips to help you choose a franchise system:

- 1. Research the franchise system. Look for information about the franchise's history, financial performance, and customer base.

- 2. Talk to current franchisees. Ask them about their experience with the franchise system and whether they would recommend it.

- 3. Visit the franchise's headquarters. This will give you a chance to see the franchise's operations and meet with the management team.

- 4. Review the franchise agreement. This document outlines the terms of the franchise system, including the fees you will pay and the rules you must follow.

- 5. Consider your own resources. Make sure you have the capital and experience to run a franchise business.

Franchising can be a great way to grow a business, but it's important to do your research and choose a franchise system that is a good fit for your business.

By following these tips, you can increase your chances of success with a franchise.
